STORVAULT

BREACHID

STORVAULT's BreachID is a proactive dark web monitoring and breach detection solution that alerts you when your business or employee data appears in stolen data dumps, malware leaks, or underground trading forums. Because by the time you hear about a breach... it's already too late.

THE CHALLENGE

The dark web serves as a marketplace for stolen credentials and confidential business data. Without proactive monitoring, organisations face heightened risks including:

- Ransomware attacks
- Loss of customer trust and brand reputation
- Operational downtime and financial impact
- Cyber insurance penalties or reduced coverage

THE SOLUTION

BreachID simplifies this process by handling the heavy lifting. It continuously scans the dark web to detect compromised data tied to your organisation – saving time, money, and effort. Get instant alerts, actionable insights, and expert guidance, empowering you to act before attackers do. From compromised credentials to info-stealer malware infections, BreachID identifies the where, how, and what behind exposures to stop further damage fast.

STORVAULT BREACHID: SEE THE UNSEEN. SECURE THE KNOWN.

BREACHID:

With StorVault's BreachID, your digital identity is monitored, protected, and secured:

- Continuous dark web and credential monitoring
- Automatic breach alerts in real time
- Source-of-exposure visibility and malware infection detection
- Actionable threat intelligence and risk scoring
- Audit-ready reports to support compliance and insurance
- Scalable protection for SMBs to large enterprises
- Expert support and breach response guidance

Why it matters

- **Reduce cyber risk:** Stop credential-based attacks before they escalate.
- **Stay compliant:** Strengthen audit and cyber insurance readiness.
- **Protect reputation:** Prevent trust erosion and costly downtime.
- **Act fast:** Instant breach alerts with expert-led response guidance.
- **Save costs:** Enterprise-grade visibility without enterprise-level pricing.

WHAT WE'RE ABOUT

- Cloud-based
- Simple
- Easy and flexible
- Affordable
- Secure and reliable
