O365

STORVAULT Metallic Office 365 Essential delivers powerful, enterprise-grade Office 365 data protection built on industry-leading technology and powered by Microsoft Azure. Metallic keeps valuable Office 365 data safe from deletion, corruption, and ransomware attack – all with the simplicity of SaaS.

THE CHALLENGE

While Microsoft® Office 365™ provides a range of industry-leading applications and business collaboration tools, the data generated by them is not automatically or comprehensively protected, accessible and recoverable within the service provided by Microsoft.

THE SOLUTION

Office 365 helps companies maximise and protect their Microsoft® Office 365™ investments by providing a comprehensive platform that delivers the best in backup, recovery, archiving, search and discovery across on-premise and remote locations.

OFFICE 365:

Comprehensive cover – Data protection and recovery for Office 365 applications including Email, OneDrive and SharePoint

Flexible solution – No on-premise infrastructure commitments; create granular policies for what must be protected and retained

Usability and accessibility – Full visibility into how the backup and restore schedules are being performed, monitored and managed

Cost-efficient – Lower TCO by subscribing to an Office 365 plan that is most appropriate to operational needs

End-to-end encryption – Data encryption at source, in-transit and at rest

Continuous data protection – Backups run automatically according to pre-defined management policies

Central console – System administrators can track, manage and report on all backup and restore jobs through a central console

Rapid recovery – Perform site-level rollback to easily restore Office 365 data

WHAT WE'RE ABOUT

- Cloud-based
- Simple
- Easy and flexible
- Affordable
- Secure and reliable
- **Good as Gold:**
  - Local support – Yes actual people, not just a machine.
  - Data is stored locally.
